

Kody Technologies LLC

License Plate Holder Install

Congratulations on your purchase and thank you for your commitment to road safety for your bikes, friends, family, and those around you. Read and follow this instruction guide to install your new Kody License Plate Holder.

Disclaimer

Tail, Brake and Turn signal lights are a critical safety feature during the operation of your vehicle. Rack lights increase your vehicle's visibility when the lights are obstructed by a bike rack, or any other device mounted to the rear of the vehicle. Please read and review all information carefully before installation. Install the light per the instructions and verify functionality on a regular basis. If you have any questions or concerns, please contact us at Kody Technologies.

- Always verify cable routing and connection and test light function prior to driving, using the light and relying on it for your safety.
- This light adds four pounds to the load on your bike rack. Check rack manufacturer's manual to verify the total load on the rack does not exceed any limits.
- Rack lights improve your visibility and signal communication on the road. They are not a substitute for driving safely and following all traffic laws.
- Kody assumes no liability for injury to persons, damage to movable or immovable property, loss of profit, or any other loss or damage caused by the improper mounting or use of the carrier, including but not limited to mounting or use in conflict with the assembly instructions, mounting instructions or any other instructions given, in writing or verbally, by Kody.

Kody Technologies LLC does not assume any responsibility or liability for accidents or injuries resulting during use of this product or misuse of this product.

Product Warranty

We've designed an extremely rugged rack light and are proud to provide a 1-year warranty on any failure on the electronics or hardware. If you experience any issues with your light please contact us, return it and we'll ship you a replacement.

Return Policy

If you are not 100% satisfied with the rack light, please contact us to let us know. We offer a 30-day hassle-free return policy. Return the light assembly in like-new condition and we'll ship you a replacement or refund your money. Most importantly we want to understand any issues you experience so we can address them, and we can continuously improve our products.

Kody Technologies LLC License Plate Holder Install

Installation Instruction

Model#: 101-004

The license plate holder installs directly onto your Kody light using existing hardware locations with new longer screws. It fits cleanly and does not affect any tray adjustment or bike loading.

Tools:

- License Plate Holder Install: 5/32" Allen Wrench and Ratchet with 3/8" socket or 3/8" Box End Wrench.
- Plate Install: Phillips head screwdriver or Thumbs

1. Remove screws and nuts holding the Kody light onto the bracket.
2. Set license plate holder in place in desired orientation (top of bottom of light).

Top Install

Bottom Install

3. Install longer screws through the light, the light bracket and license plate bracket with both washer and install the nut onto the screw. Tighten the screw into the nut until all parts are clamped well.

Screw and Nut Install

4. Install your license plate when needed into the threaded holes using the M6 screws or the thumb screws.

5. **Caution:** The license plate edges can be sharp. Please be cautious when working around the plate. If you have a plate cover, please use it. Or apply a layer of tape to the edge of the plate.
