## Bike Rack Light – Yakima HoldUp EVO

Congratulations on your purchase and thank you for your commitment to road safety for your bikes, friends, family, and those around you. Read and follow this instruction guide to install your new Yakima HoldUp EVO Rack Light.

### Disclaimer

Tail, brake and turn signal lights are a critical safety feature during the operation of your vehicle. Rack lights increase your vehicle's visibility when the lights are obstructed by a bike rack, or any other device mounted to the rear of the vehicle. Please read and review all information carefully before installation. Install the light per the instructions and verify functionality on a regular basis. If you have any questions or concerns, please contact us at Kody Technologies.

- Always verify cable routing and connection and test light function prior to driving, using the light and relying on it for your safety.
- This light adds four pounds to the load on your bike rack. Check rack manufacturer's manual to verify the total load on the rack does not exceed any limits.
- Rack lights improve your visibility and signal communication on the road. They are not a substitute for driving safely and following all traffic laws.
- Kody assumes no liability for injury to persons, damage to movable or immovable property, loss of profit, or any other loss or damage caused by the improper mounting or use of the carrier, including but not limited to mounting or use in conflict with the assembly instructions, mounting instructions or any other instructions given, in writing or verbally, by Kody.

Kody Technologies LLC does not assume any responsibility or liability for accidents or injuries resulting during use of this product or misuse of this product.

### Product Warranty

We've designed an extremely rugged rack light and are proud to provide a 1-year warranty on any failure on the electronics or hardware. If you experience any issues with your light please contact us, return it and we'll ship you a replacement.

### Return Policy

If you are not 100% satisfied with the rack light, please contact us to let us know. We offer a 30-day hassle-free return policy. Return the light assembly in like-new condition and we'll ship you a replacement or refund your money. Most importantly we want to understand any issues you experience so we can address them, and we can continuously improve our products.

**Bike Rack Light – Yakima HoldUp EVO**  
**Installation Instruction**

**Model #: 101-018**

1. The rack light can install on both the two-bike rack or the extension. It mounts to existing hardware locations, fits cleanly and does not affect any tray left or right adjustment.
2. For two bike rack install: Set the light on the center beam and install the 4" screw with washer through the assembly. Install a washer and the nut to the screw.

**Bracket with Screw, Washers and Nut**

3. Tighten the screw and nut while holding the bracket down level and flush with the top of the rack beam. Tighten until the bracket is firmly clamping the beam.

**Hold bracket Down and Flush During Tightening**

4. For extension install: The light mounts to the flagpole location. Remove the flagpole if fitted with one. The light can be used with or without the flag, but we recommend not using it. The light

also works with or without the red end cap bottle opener.

5. Set the light on the center beam, line up the top hole and install the screw with lock and flat washers. Tighten while holding the bracket against left side of beam until firm.

**Hold Light Against Left Side During Tightening**

6. Route cable along the length of the bike rack and secure with the provided cable ties. Bike racks have many pivot points. Be sure to route the cable away from and around pivots to keep them from getting pinched.

**Cable Routing**

7. Connect the light to your vehicle's power supply and test all light functions (tail, brake, hazard, left and right-hand turn signals).
8. If signals do not function correctly on your vehicle, please see the "How to" page on our website for LED Trailer Lights or contact us.
