

Kody Technologies LLC

Bike Rack Light – Kuat NV

Congratulations on your purchase and thank you for your commitment to road safety for your bikes, friends, family, and those around you. Read and follow this instruction guide to install your new Kuat NV 2.0 Bike Rack Light.

Disclaimer

Tail, Brake and Turn signal lights are a critical safety feature during the operation of your vehicle. Rack lights increase your vehicle's visibility when the lights are obstructed by a bike rack, or any other device mounted to the rear of the vehicle. Please read and review all information carefully before installation. Install the light per the instructions and verify functionality on a regular basis. If you have any questions or concerns, please contact us at Kody Technologies.

- Always verify cable routing and connection and test light function prior to driving, using the light and relying on it for your safety.
- This light adds four pounds to the load on your bike rack. Check rack manufacturer's manual to verify the total load on the rack does not exceed any limits.
- Rack lights improve your visibility and signal communication on the road. They are not a substitute for driving safely and following all traffic laws.
- Kody assumes no liability for injury to persons, damage to movable or immovable property, loss of profit, or any other loss or damage caused by the improper mounting or use of the carrier, including but not limited to mounting or use in conflict with the assembly instructions, mounting instructions or any other instructions given, in writing or verbally, by Kody.

Kody Technologies LLC does not assume any responsibility or liability for accidents or injuries resulting during use of this product or misuse of this product.

Product Warranty

We've designed an extremely rugged rack light and are proud to provide a 1-year warranty on any failure on the electronics or hardware. If you experience any issues with your light please contact us, return it and we'll ship you a replacement.

Return Policy

If you are not 100% satisfied with the rack light, please contact us to let us know. We offer a 30-day hassle-free return policy. Return the light assembly in like-new condition and we'll ship you a replacement or refund your money. Most importantly we want to understand any issues you experience so we can address them, and we can continuously improve our products.

Bike Rack Light – Kuat NV

Installation Instruction

Model#: 101-011

The rack light installs at the back of the rack using the same mount locations as a rack extension. It uses the same size screws, fits cleanly and does not affect any tray adjustment or bike loading.

1. If your rack is equipped with a bike repair stand; unlatch and extend or remove it to make space for installation.

Extend Bike Stand

2. Remove M12 screws on NV 2.0 or two ¼-20 screws on NV 1.0 from end of rack.

Remove Screw or Screws

3. Place light on rack end and install M12 screw or provided longer ¼-20 screws on NV 1.0 through the bracket and into the end of the rack.

Kody Technologies LLC
Protect Your Ride

4. Tighten screws per rack manufacturer instructions or comfortably tight.

Place Light and Install Screw

5. Route cable along length of rack to vehicle connection and use cable ties to secure the cable to the rack frame. Bike racks have many pivot points. Be sure to route the cable away from and around pivots to keep them from getting pinched.

Routed cable along rack and test the light.

6. Connect the light to your vehicle's trailer connection and test all light functions (tail, brake, hazard, left and right-hand turn signals).
7. If turn signals do not function correctly on your vehicle, please see the "How to" page on our website for LED Trailer Lights or contact us.
